PROFESSIONAL SUMMARY

Full-Stack Engineer delivering scalable web applications with **React.js, Next.js, TypeScript, Node.js, and Python**. Specializes in architecting robust RESTful APIs, secure payment systems, and dynamic geolocation features. Leverages fintech and health-tech expertise to build comprehensive insurance and digital health platforms.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL
Frontend: HTML, CSS, React.js, Next.js, Redux, React Native
Backend: Node.js, Express.js, FastAPI, AWS
Databases: MongoDB, PostgreSQL, VectorDB (Qdrant)
App Technologies: React Native
AI & LLM Tools: OpenAI API, Google Gemini API, HuggingFace Models, Claude Code, Windsurf, Antigravity
Tools: Git, PgAdmin, Android Studio, VSCode, ClickUp, Jira, Postman, Jest, Cypress

WORK EXPERIENCE

Software Development Engineer — Feb 2025 - Jul 2026

ImpactGuru - Mumbai, Maharashtra

- Built a real-time health insurance comparison engine and independently delivered a full-scale term insurance module featuring scalable APIs, SEO-optimized frontend, and responsive cross-device UI enabling users to evaluate plans from multiple providers and make faster decisions.
- Built a secure end-to-end **ABHA card generation** and download flow with government (ABDM) digital health stack integration, featuring OTP-based Aadhaar verification and multi-mode verification (mobile number, ABHA number, Aadhaar, address), reducing manual onboarding time by 40% and improving identity match success rate by 35%.
- Integrated **Razorpay payment gateway** to enable secure real-time transactions within the CarePal Money platform, supporting future health plan purchase workflows.
- Implemented Cashfree NetBanking payment integration for HDFC and ICICI banks, expanding payment options, improving transaction success rates, and enhancing checkout flexibility.

Junior Software Development Engineer — Jan 2024 - Jan 2025

Metta Social Solutions Pvt Ltd, Pune, India

- Led the full implementation of the **Google Maps API** from proof of concept to production, enabling geolocation-based features.
- Built a high-performance, dynamic autocomplete search experience using Next.js, TypeScript, and React Query with real-time, highlighted suggestions.
- Optimized API response times by refactoring queries and integrating efficient data retrieval techniques, including improved SQLAlchemy joins with custom sorting and pagination.
- Created RESTful APIs using Node.js and Python, supporting scalable microservices consumed by other backend systems.

KEY PROJECTS

KnowledgeFlow AI - Enterprise RAG Platform

Tools: Next.js | Express | TypeScript | PostgreSQL | Qdrant | OpenAI | NVIDIA API

- Architected an enterprise-grade **RAG** platform featuring an end-to-end document processing pipeline (**extraction, chunking, embeddings, and vector storage**) for grounded **semantic search** and AI-powered knowledge discovery.

AI Code Converter App

Tools: Next.js | React | Google Gemini API

- Developed a full-stack AI Code Translator enabling instant, highly accurate, and idiomatic code conversion across **10+ programming languages** while preserving original logic.

EDUCATION

Full Stack Web Development - Masai School (Certificate) | Bengaluru, India — **Oct 2022 - Sep 2023**

Trained in JavaScript, Node.js, React, MongoDB, and Agile development. Built Resume Builder Platform and led collaborative group projects.

Bachelor of Pharmacy - Government College of Pharmacy Karad | Karad , India — **July 2018 - Aug 2022**
